

## **REMARKS**

Applicants have carefully reviewed the office action mailed on November 11, 2008. Claims 15, 19 and 20 have been amended; claims 10-11, 13-14, 27-31, 33-36, 39-45 are cancelled, and as a results claims 1-9, 12, 15-26, 32, 37-38, 46-67 are pending in this application. No new matter has been added.

## **Formalities**

The hyperlink found on page 12, lines 6-11 of the specification has been deleted.

Figures 1 and 2 were found to contain sequences which were not described in terms of their sequence listing in the specification. The description of the figures and the text has been amended as indicated in this response at page 2.

Claims 13, 14, 15, 19 and 20 are objected to for the reasons recited by the Examiner. The suggested modifications to the claims were adopted and do not change the scope of the claims and were not made over art cited. Namely “a heparin-binding growth factor receptor” replaces “the heparin-binding growth factor receptor” at claims 13 and 14. In claim 15, the following amendment was made “J<sub>1</sub> is, and[[,]] if n = 1, J<sub>1</sub> and J<sub>2</sub> is a diamine amino acid residue” to clarify the recited element. Similar amendments were made to claims 19-20.

## **Doubule Patenting Rejection**

## **35 USC § 112, Second Paragraph**
